JOMA 3600

AIR INLETS

 **JOMAPEKS**

Jomapeks is launching a unique air inlet system that ensures a constant, even supply of fresh air into the house in all conditions. It puts an end to cold air dropping down onto your animals and the litter stays nice and dry, avoiding foot problems. Your animals stay healthy and grow better, and the consistent growth conditions improve uniformity. The **Joma 3600** air inlet system consists of an air inlet valve, an intelligent actuator and a smart control computer

SELF-OPENING

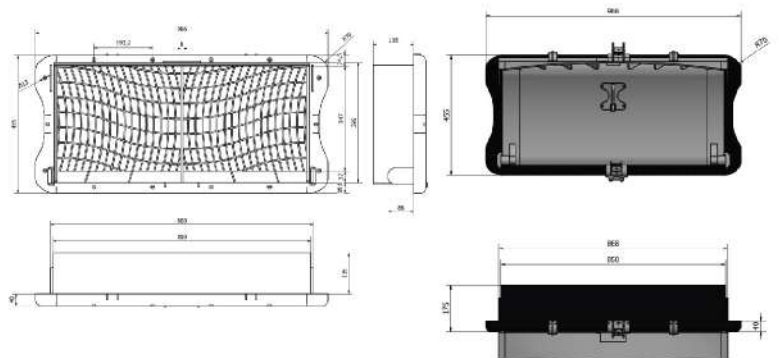

SELF-CLOSING

- Plastic protection netting against birds and rodents. It reduces the risk of infection
- Mounting brackets for easy and fast, installation, always included
- Setup of flap for minimum ventilation, without opening the inlet
- The deflectors guide the air flow with the requested angle
- The sharp edge of the valve provides the strong airflow
- The curved flap of the inlet guides air flow to the ceiling
- Strong construction of the inlet base
- Adjustable spring / summer opening
- The fixing and guiding of rod/rope

Airflow in m3/h pressure Pa (Pascal)			Force	Stroke	Weight
10	20	40	kg	mm	kg
2600	3600	4800	6,0	440	7,5
